Senior / Lead UX Designer

I'm really excited to submit my application for the Senior / Lead UX Designer role.

I'm first and foremost a Product Designer, but have also worked as a Front-end Developer in every position I've worked for the last 8 years.

Whether or not I actually do any development work in this new role, I find my skill-set here means I can act as a translator between the two departments, switching between thinking for the user, and thinking for the developers. Design systems are my bread and butter.

Most recently, I've built and launched [Bolstr](#) by myself, while working full-time at Frasers Labs building out [desktop Property Management software](#) and [open-source enterprise eCommerce](#).

Hope to hear from you soon!

Cheers

Morgan
